Tokenization Infrastructure for Real Estate.

Infographic By
Howtocommerce.org

PROJECT SUMMARY

Real estate has long been considered a sound investment, but it can be difficult for individuals to get involved due to the high cost of entry. Blocksquare is looking to change that with their innovative tokenization process. By creating tokens that represent the economic value of an asset, they are opening up investment opportunities to people all over the world. The blockchain-based smart contracts used to create these tokens also provide easy accounting and instant settlements. This makes it easy for investors to track their returns and receive their share of the profits. With their tokenization process, secondary marketplace, white-label solutions and decentralized financial tools, they are in position to make a big impact on the real estate industry.

PROS

- Highly experienced and connected team
- Already tokenized 50 million in real estate assets
- Hacken Security audit score of 9.7/10
- Unlimited potential upside
- Extremely active team with weekly youtube AMA's, conferences, social media, etc.

- Token has limited liquidity and no centralized exchanges
- Brand new Use-case implementing new technology, adoption might take time as education is needed
- Overall market is bearish, opportunity cost is a risk
- Not tokenizing equity directly
- Inflation of the token

CONS

TOKENOMICS

- ICO price \$0.10-\$0.25
- Total supply: 100,000,000
- Circulating supply today: 14,315,392
- Team BST vesting: 24 months after launch of v0.1 (22.2.2024)
- Mentors BST vesting: 12 months after launch of v0.1 (22.2.2023)

Governance

- You can stake the token to participate in the governance program .
- Staking turns \$BST into \$sBST which allow you to earn more BST and vote on proposals.

TOKEN USE-CASE

Partnerships

-Blocksquare offers hefty discounts to those who stake certain amounts in the governance pool. Discounts to the cost of the white label platform, social media support, higher default thresholds on their defi platform and to the tokenization cost of each property.

Buybacks

-Any token backed by real estate thats traded on OceanPoint's marketplace has a fee attached in which OceanPoint then collects a small part of the tokenized real estate. When revenue is paid, that is used to buyback \$BST off the market and used for governance rewards.

HOPSIUM

THIS DOES NOT TAKE INTO ACCOUNT INFLATION

ROI	Price	Market Cap
x1	\$0.10	\$1,531,861
x3	\$0.30	\$4,595,583
x10	\$1.00	\$15,318,610
x25	\$2.50	\$38,296,525
x100	\$10.00	\$153,186,100
