

PROTON

BLOCKCHAIN

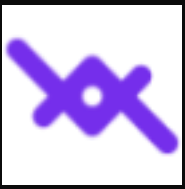

Connecting Traditional Finance to Decentralized Finance

Infographic By
Howtocommerce.org

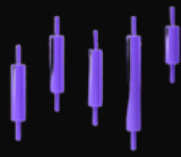

PROJECT SUMMARY

- Blockchain and Smart Contract Platform
- Currently handles 4,000 transactions per second (TPS) with free transactions for end-users
- Universal @names replace confusing wallet addresses for everyday use
- WebAuth.com wallet enables device authentication, identity management & payment processing
- Proton Swap allows crypto token swapping between different blockchains & offers yield farming incentives
- Proton Market provides transparency & safe access to blockchain projects & tokens
- Proton Commerce Kit creates simple payment solutions powered by the Proton blockchain

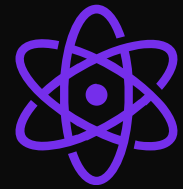

ECOSYSTEM

PROTON LOAN
DeFi Lending Protocol

PROTON DEX
Dex, Swap, Pool, Farm
Bridge, Fiat gateway

PROTON MARKET
NFT Marketplace

TOKEN USE-CASE

Resources

Proton offers business/developers varying resource plans that can provide increased transaction per second, storage space, and more, depending on the plan used. Paid in \$XPR

Staking

Staking allows users to receive a proportion of the block rewards by voting for four block producers, with a variable APR depending on the amount of XPR they have staked.

Governance

XPR holders will be able to submit proposals and participate in voting on the DAO dashboard once it is live. The proposals and votes will be related to the Proton Blockchain.

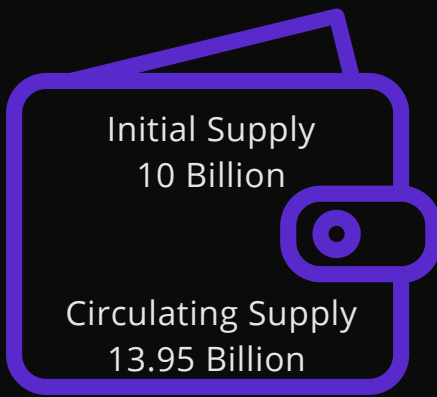

Nft Minting

XPR is used to mint NFTs on Proton Market, and is automatically converted from XUSDC for use in the Proton ecosystem.

TOKENOMICS

Inflation

- 4% per Annum
- 1% Yield Farming
- 1% Block Producers
- 1% Stake and Voting
- 1% Governing Consortium

Burns

- 10% of XPR for NFT minting
- 0.1% of swap fees

Over

540,000

Accounts

HOPIUM

ROI	Price	Market Cap
x1	\$0.00188	26 Million
x3	\$0.0054	78 Million
x10	\$0.0188	260 Million
x25	\$0.045	650 Million
x100	\$0.188	2.6 Billion
